PROJECT MANAGEMENT INSTITUTE
Making project management indispensable for business results.*

EC-Council

World-class knowhow and credentials of our consultants

- **Information Security Services and ISO 27001 Consulting**

ISO 27001 was published by the International Organization for Standardization (ISO) on 15 October 2005. Essentially, ISO/IEC 27001 defines an Information Security Management System (ISMS) and complements the ISO/IEC 17799 'code of practice' standard, itself first published as BS 7799-1. The two standards are closely aligned and related, but perform distinctive roles.

ISO/IEC 27001 is a standard setting out the requirements for an information security management system (ISMS). The standard is designed to ensure the selection of adequate and proportionate security controls that protect information assets and give confidence to interested parties including an organization's customers.

We can help your organization protect information asset from wide range of threats to ensure business continuity, minimize business damage and maximize return on investments and business opportunities. In short ensures preservation of Confidentiality, Integrity and Availability of your business critical data.
