

Course:

Microsoft Access 2016: Basic

Duration: 1 day

Description:

This ILT Series course covers the basic skills and concepts students need to use Microsoft Access 2016 productively and efficiently. After an introduction to the Access 2016 environment, students will learn how to plan databases and create tables. Then they will learn to organize fields and records, and to work with data entry rules. They will learn how to create basic queries, and how to work with forms and reports.

This course will help students prepare for the Microsoft Office Specialist exam for Access 2016 (exam 77-424). For comprehensive certification training, students should complete the Basic, Intermediate, and Advanced courses for Access 2016. We also provide an online test preparation application for this course. Click the Test Prep/Assessment link on Axzo's home page to find a list of the applications.

Table Of Contents:

Unit 1: Getting started

Topic A: Database Concepts

Topic B: Exploring the Access environment

Unit 2: Databases and tables

Topic A: Planning and designing databases

Topic B: Exploring tables

Topic C: Creating tables

Unit 3: Fields and records

Topic A: Changing the design of a table

Topic B: Finding and editing records

Topic C: Organizing records

Unit 4: Data Entry rules

Topic A: Setting field properties

Topic B: Working with input masks
