

Course:

Enterprise IT Governance Implementation (using COBIT 5 and Best Practices)

Duration: 2 Days (09:00 – 16:00)

Overview:

COBIT 5 is the only business framework for the governance and management of enterprise IT. This evolutionary version incorporates the latest thinking in enterprise governance and management techniques, and provides globally accepted principles, practices, analytical tools and models to help increase the trust in, and value from, information systems. COBIT 5 builds and expands on COBIT 4.1 by integrating other major frameworks, standards and resources, including ISACA's Val IT and Risk IT, Information Technology Infrastructure Library (ITIL®) and related standards from the International Organization for Standardization (ISO).

Benefits:

COBIT 5 helps enterprises of all sizes:

- Maintain high-quality information to support business decisions
- Achieve strategic goals through the effective and innovative use of IT
- Achieve operational excellence through reliable, efficient application of technology
- Maintain IT-related risk at an acceptable level
- Optimize the cost of IT services and technology
- Support compliance with relevant laws, regulations, contractual agreements and policies

What you will learn:

- How IT management issues are affecting organizations ;
- The need for a control framework driven by the need for IT Governance;
- How COBIT meets the requirement for an IT Governance Framework;
- How COBIT is used with other standards and best practices;
- The functions that COBIT provides, and the benefits of using COBIT;
- The COBIT Framework and all the components of COBIT;
- How to apply COBIT in a practical situation;

Content:

Day 1

The need for a control framework to meet an organization's need for IT Governance.

- How COBIT meets this requirement for an IT Governance Framework.
- The functions and benefits that COBIT provides.
- The COBIT Framework and the components of COBIT (Control Objectives, Control Practices, Management Guidelines, Assurance Guide).
